EDUCATIONAL STUDIES IN MATHEMATICS

Volume 46 Nos. 1–3 2001

Bridging the Individual and the Social:
Discursive Approaches to Research in Mathematics Education
A PME Special Issue

Guest Editors: Carolyn Kieran, Ellice Forman and Anna Sfard

Guest Editorial 1–11

Acknowledgements 12

ANNA SFARD / There is more to discourse than meets the ears: Looking at thinking as communicating to learn more about mathematical learning 13–57

BERT VAN OERS / Educational forms of initiation in mathematical culture 59–85

STEPHEN LERMAN / Cultural, discursive psychology: A sociocultural approach to studying the teaching and learning of mathematics 87–113

ELLICE FORMAN and ELLEN ANSELL / The multiple voices of a mathematics classroom community 115–142

MARY CATHERINE O'CONNOR / "Can any fraction be turned into a decimal?" A case study of a mathematical group discussion 143–185

CAROLYN KIERAN / The mathematical discourse of 13-year-old partnered problem solving and its relation to the mathematics that emerges 187–228

VICKI ZACK and BARBARA GRAVES / Making mathematical meaning through dialogue: "Once you think of it, the Z minus three seems pretty weird" 229–271

Commentary papers

CELIA HOYLES / From describing to designing mathematical activity: The next step in developing a social approach to research in mathematics education? 273–286

FALK SEEGER / Research on discourse in the mathematics classroom: A commentary 287–297
